

भारतीय मानक ब्यूरो

BUREAU OF INDIAN STANDARDS

मध्यम घनत्व पार्टिकल बोर्ड और हार्डबोर्ड के चयन और उपयोग के लिए मार्गदर्शन प्रदान करने के लिए बीआईएस ने भारतीय मानक क्रमशः आईएस 15932 (भाग 1) और आईएस 15932 (भाग 2) को प्रकाशित किया है। उपरोक्त मानकों में विभिन्न प्रकार के विभिन्न प्रकार / ग्रेड के चयन, उनके भंडारण और हैंडलिंग, काटने, जोड़, फिक्सिंग, परिष्करण और फास्टरों का उपयोग शामिल हैं।

BIS has published Indian Standard IS 15932 (Part 1) and IS 15932 (Part 2) to provide guidance for selection and use of Medium Density Particle boards and Hardboards respectively, covering their storage and handling, cutting, jointing, fixing, finishing and use of fasteners.

Code of Practice for Selection and Use of Various Types of Lignocellulosic Panel Products

Part 1 Medium Density Particle Boards

Part 2 Hardboards

There are number of wood (and other lignocellulosic) panel products being used in the country. To cover the quality requirements of such products, several Indian Standard specifications have been formulated by Bureau of Indian Standards. These products are put to different uses depending upon their suitability for different application.

In view of construction and properties of these panel products being different from that of wood, especially with regard to carpentry work, BIS has come out with the following standards to provide proper guidance to industry and consumer in the selection and use of these panel products:

- 1. IS 15932 (Part 1) : 2012 Code of Practice for Selection and Use of Various Types of Lignocellulosic Panel Products Part 1 Medium Density Particle Boards.**
- 2. IS 15932 (Part 2) : 2017 Code of Practice for Selection and Use of Various Types of Lignocellulosic Panel Products Part 2 Hardboards**

The above standards cover selection of different types/grades for different applications, their storage and handling, cutting, jointing, fixing, finishing and use of fasteners.
